## Your mission

In our team you will work on exciting infrastructure projects, and you will be entrusted with the following tasks:

- Project management and steering, coordination and monitoring of complex projects in the field of infrastructure (airport and rail)
- Conducting meetings at operational and management level as well as supervising the according reporting
- Leading and accompanying planning and construction meetings
- Presentation of status reports and project results in steering boards
- Ensuring and monitoring costs, deadlines and quality targets according to internal and external customer-specific requirements
- Creation and updating of schedules, project manuals and project management methodologies
- Representing the customer's interests towards authorities and planners as well as executing companies
- Independent processing of administrative tasks
- Working at the client's site, mostly in Germany

## What you can expect

As a Consultant / Construction Engineer (f/m/d) you will contribute to the success of key players in the travel, transport and logistics industry by maximizing efficiency, evaluating data, optimizing processes and implementing new solutions. You will drive our clients' transformation and digitalization. In our dynamic team you will be responsible for different project work packages that include leading of workshops, developing concepts and strategies, and to execute these with our clients on site.
