## Your mission

In our team you will work on exciting projects, and you will be entrusted with the following tasks:

- Identification of business requirements in the area of crew management processes
- Mapping of business requirements to technical solutions / crew planning system
- Assessment of technical solution options with respect to business impact and process changes
- Definition of target processes in the area of crew management (e.g. manpower planning, pairing, rostering, roster maintenance and crew tracking), continuous improvement and optimization of the processes in terms of complexity reduction for the use of the standard product as well as benchmark
- Identification of change requests
- Information support for financial benefit calculation / business case
- Professional creation and maintenance of the project documentation

## What you can expect

As a Senior Consultant Crew Management (f/m/d) you will contribute to the success of key players in the travel, transport and logistics industry by maximizing efficiency, evaluating data, optimizing processes and implementing new solutions. You will drive our clients' transformation and digitalization. In our dynamic team you will be responsible for different project work packages that include leading of workshops, developing concepts and strategies, and to execute these with our clients on site.

If this position appeals to you, but you still lack one or two of the required references, we would be pleased to receive your application as a Consultant Crew Management. In this position, you have great opportunities to develop and take on the role of Senior Consultant in a timely manner.

We are looking forward to your application:
